AI and Automation: Phase 4

Phase 4 sample plan

Test the Solution:
    Test the Python script with different language combinations.
    Verify data is correctly stored in the respective S3 buckets.

Optimize and Debug:
    Identify and fix any bugs.
    Optimize the IaC script for scalability and maintainability.

Document the Process:
    Provide clear instructions for deploying the infrastructure and running the translation script.
    Include details on permissions, usage, and troubleshooting.
